## RUBBER GLASS SETTING TAPE

### SECURELY INSTALL STATIONARY GLASS WITH OUR SETTING TAPE

Strong and flexible, Cooper Standard Industrial and Specialty Group (ISG)'s SealStrip® Glass Setting Tape works on virtually any stationary glass application. It seals against dirt and weather, as well as insulates against sound and vibration. SealStrip® is also perfect for vent work because it is flexible enough for tight corners yet will not stretch out of shape. It is easy to use and thin enough to prevent glass from cracking or breaking during installation. To install, fold it over the glass edge, insert into a metal frame or channel, and trim it to size.

#### APPLICATIONS

- Glass
- Windshield

#### MARKETS SERVED

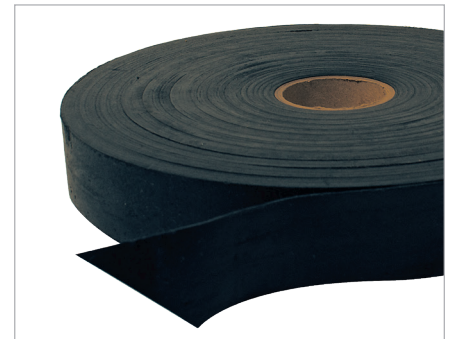

- Automotive
- Construction

#### MATERIALS & STYLES

- 100% Rubber Compound

#### ADDITIONAL BENEFITS

- Clings to Glass During Application; Holds Tightly When Glass is Set
- Peels off Roll Easily Without Tearing
- Applies Easily Without Oil
- For Special Applications, Absorbs Oil and Swells to Ensure Extra-strong Grip
- Age and Moisture Resistant
- Specially Compounded Rubber Will Not Bleed onto Glass
